DETAILED ACTION

Ex Parte Quayle

- 1. This application is in condition for allowance except for the following formal matters:
- 2. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The following title is suggested:

Speech Recognition with Request Level Determination.

Prosecution on the merits is closed in accordance with the practice under *Ex* parte Quayle, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO**MONTHS from the mailing date of this letter.

Allowable Subject Matter

- 3. Claims 1 to 20 are allowed.
- 4. The following is an examiner's statement of reasons for allowance:

The prior art of record does not disclose or fairly suggest the limitations of independent claims 1, 6, 14, and 16, wherein speech recognition specifies a character string as a non-specific (or specific) instruction type operation character string, a request level is determined on the basis of speech features, and an object to be

operated is specified based on the operation character string and the request level. Specification, Page 7, Lines 3 to 22, identifies a desire type character string as a nonspecific instruction type operation character string, e.g. "I feel hot" or "I am hungry", and a corresponding specific instruction type operation character string as "Turn on the air conditioner" or "Find a restaurant", respectively. Request level determination operates on the basis of change in loudness, pitch, or speed of voice to determine what response to provide. Thus, if the user says, "I feel hot", a first level response is to provide an indication of the temperature inside the vehicle, a second level response is to provide an indication of a question as to whether the user wishes to operate the air conditioner, and a third level response is to provide an instruction to operate the air conditioner. (Specification, Page 9) The prior art of record does not disclose or fairly suggest determining a response based on a combination of a character string provided by speech recognition and a request level on the basis of speech features, wherein a nonspecific instruction type operation character string is differentiated from a specific instruction type operation character string.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
